# Developments of ORCHIDEEcrop and adaptation for Asian rice

X Wang, X Wu, P Ciais, N Vuichard, N  
Viovy, L Li, S Piao

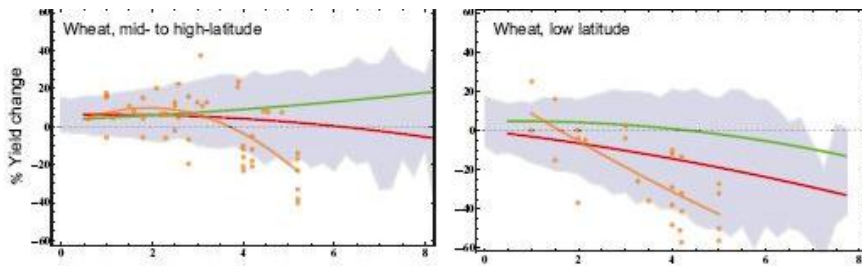

# Crop modelling

Parry et al., 2004

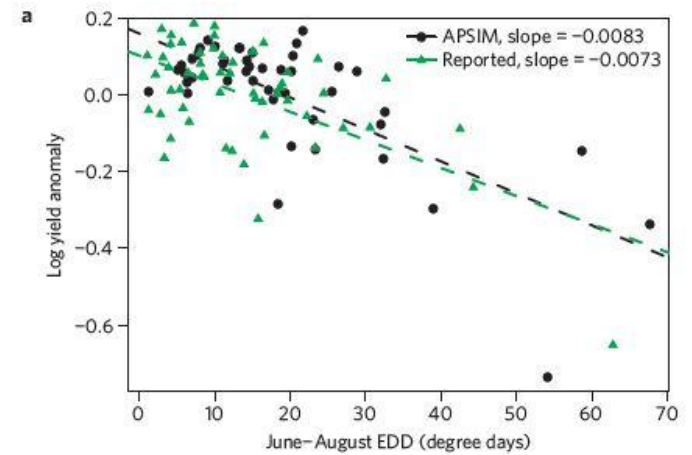

Fischer et al., 2005

Rozenzweig et al., 2014

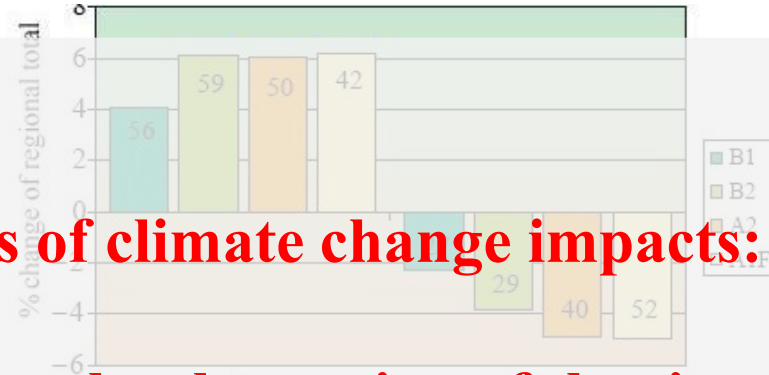

Asseng et al., 2014

Lobell et al., 2013

# Crop modelling

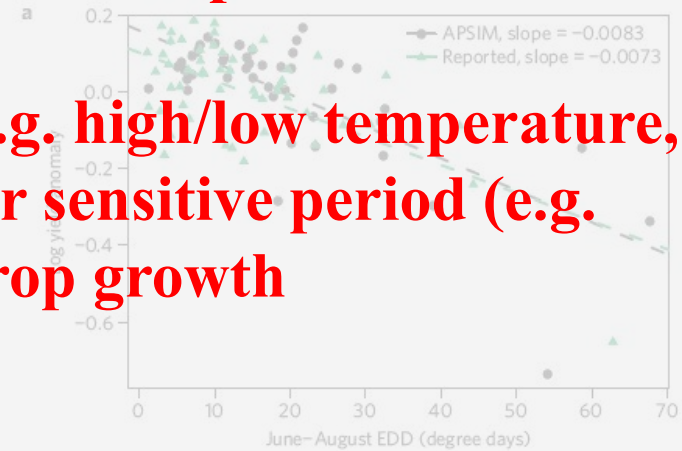

**Key physiological processes of climate change impacts:**

- **Reduced crop yield due to the shortening of the time to maturity with increasing mean temperature**

Fischer et al., 2005

- **Adverse climatic anomalies (e.g. high/low temperature, extreme rainfall, drought) over sensitive period (e.g. flowering & grain filling) of crop growth**

Lobell et al., 2013

Asseng et al., 2014

# Performance of ORCHIDEEstandard

# ORCHIDEEstandard vs. ORCHIDEEcrop

## Wheat

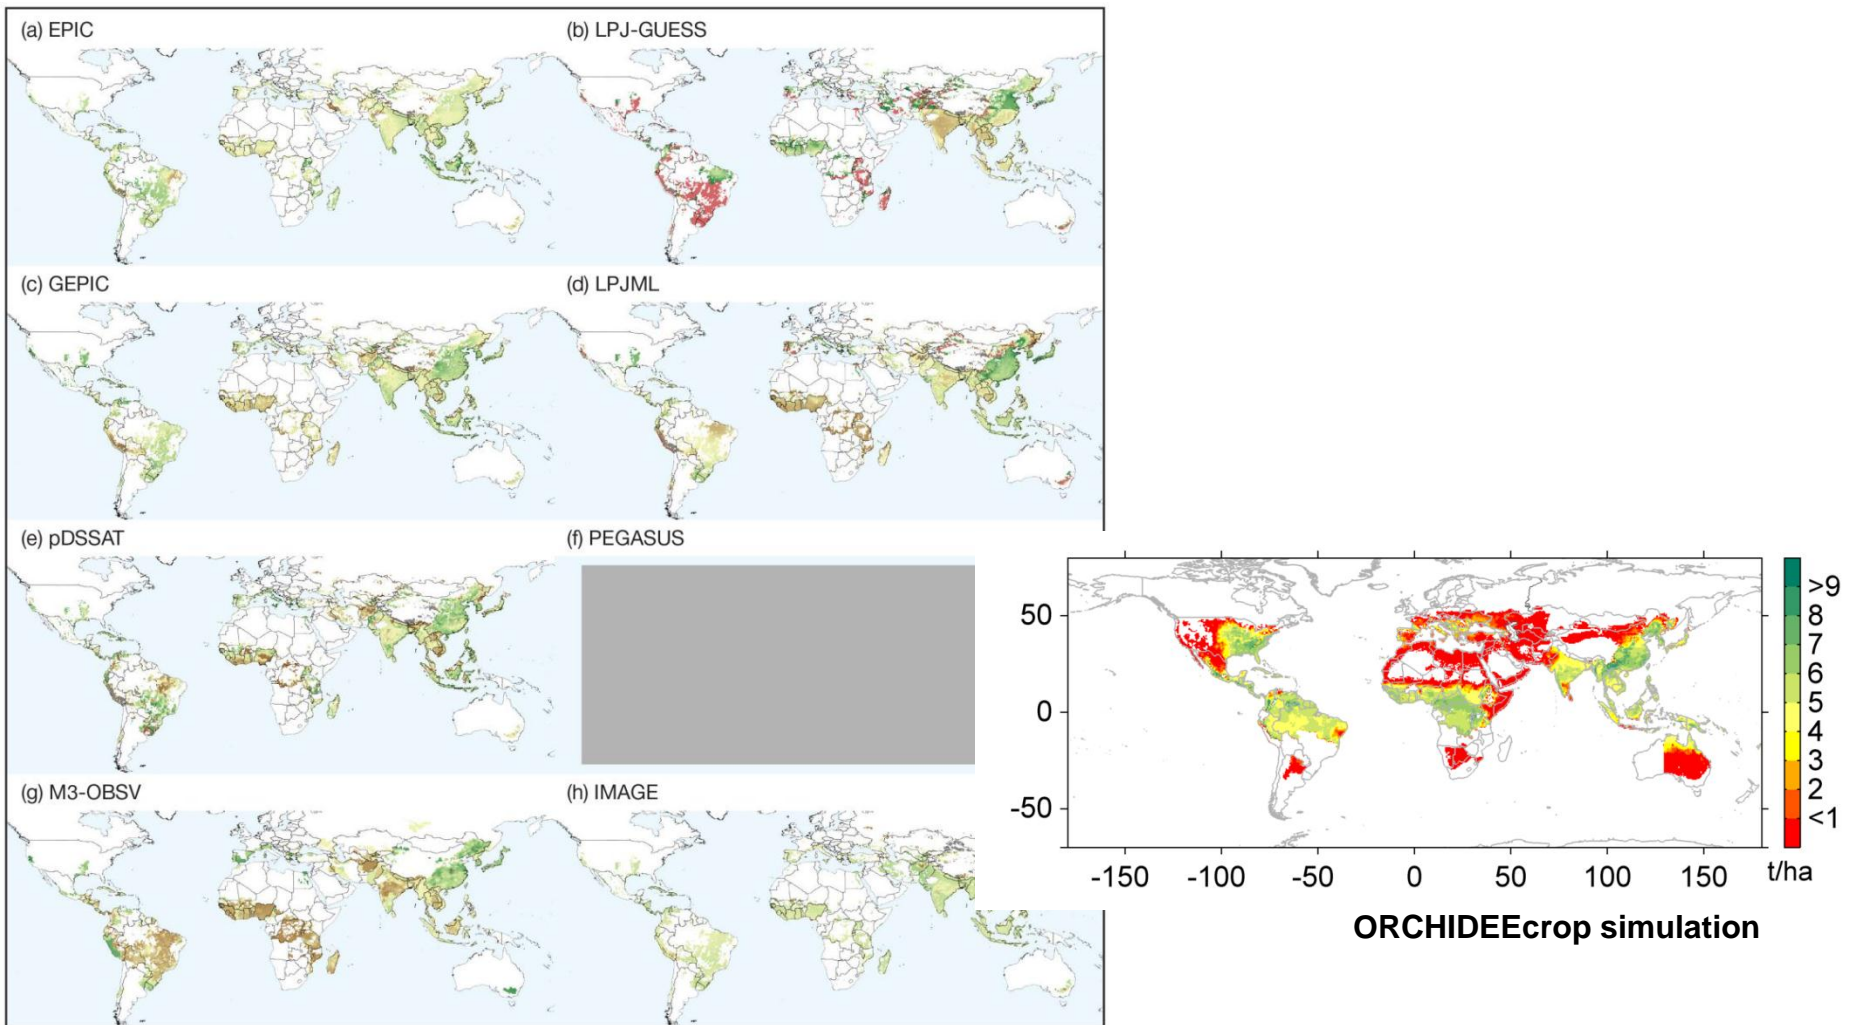

## Maize

## Rice

# Simulated pattern of rice yield

Baseline Rice Yield (t/ha)

# Managements

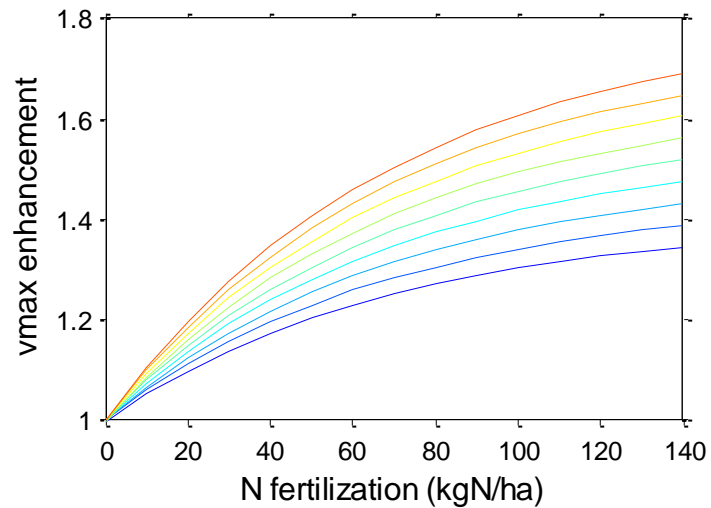

---

- Nitrogen fertilization
- Irrigation practices
- ... ..

# Managements

---

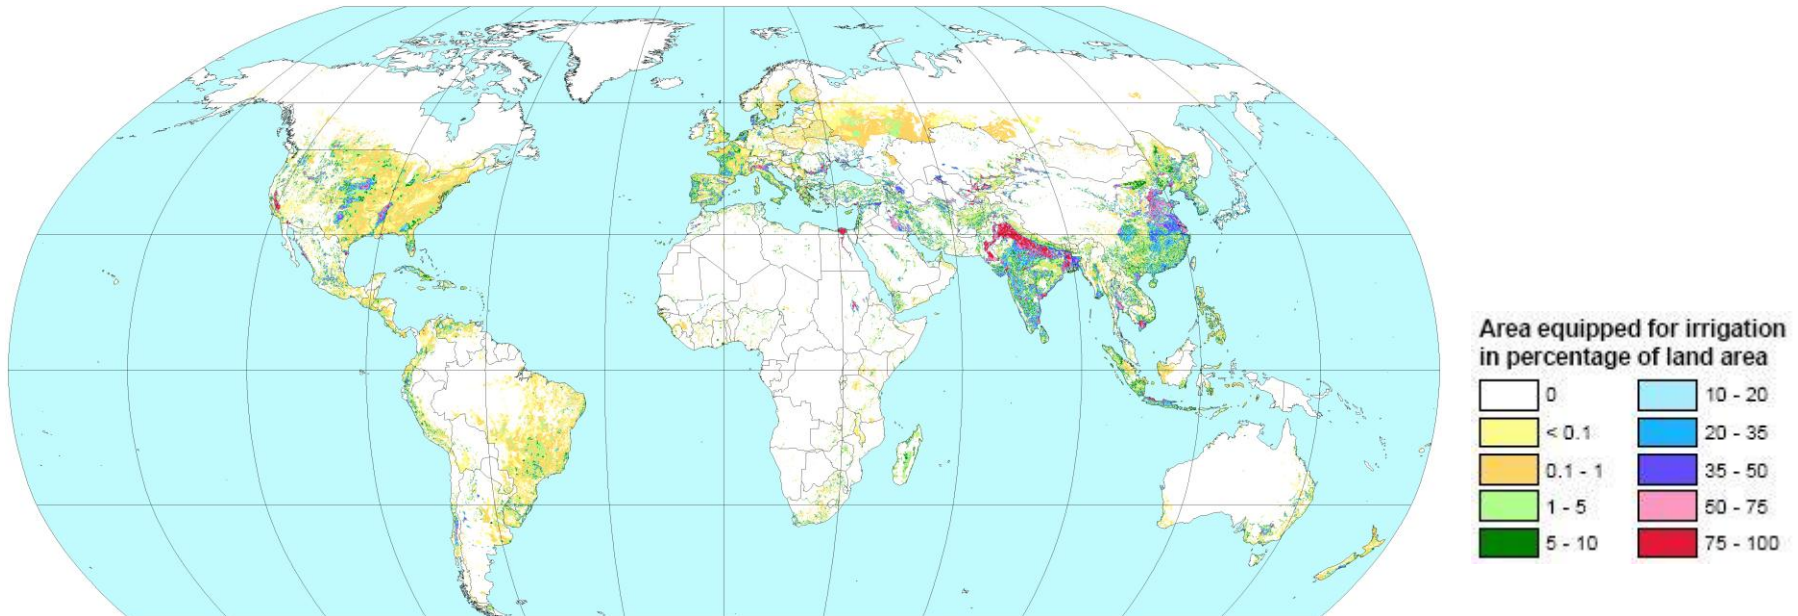

- Nitrogen fertilization
- Irrigation practices

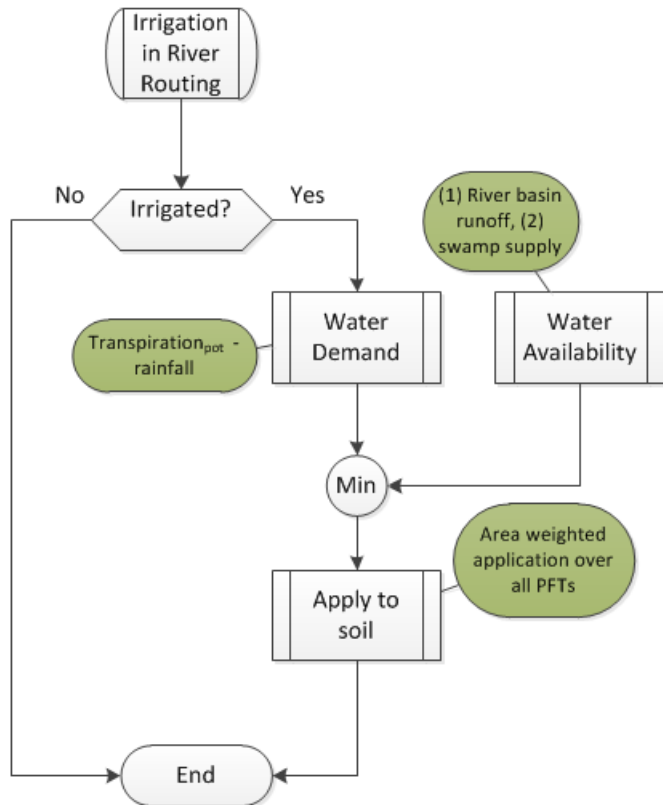

# Managements

- Nitrogen fertilization
- Irrigation practices

# ORCHIDEE standard irrigation scheme

- Limitations:
  - Only activated with river routing
  - Water demand & applications over all PFTs
  - Considering only potential transpiration, not PET (always deficit)
  - no room for varying irrigation technologies/strategies

# Solution?

# ORCHIDEEcrop irrigation scheme

- Addressing:
  - When?
  - How much?
  - How?
  - Where?

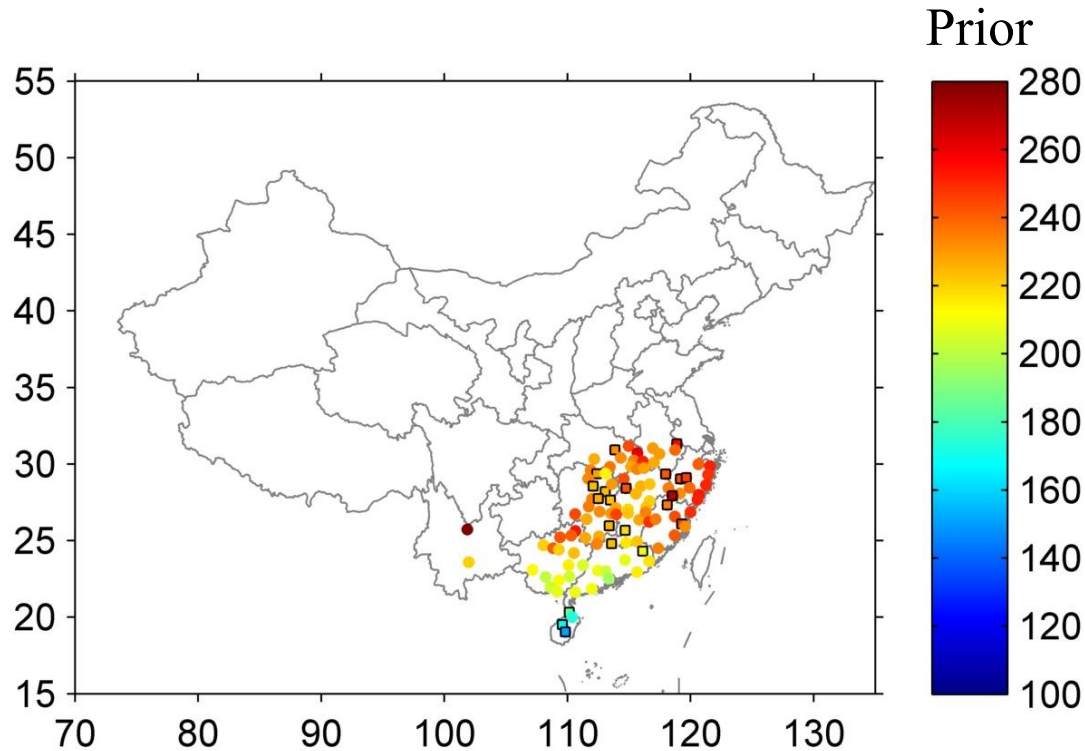

# Adaptation for rice crop in Asia

---

- Crop phenology
- Sensitivity to Nitrogen fertilizer application

# Spatial distribution of early rice sites

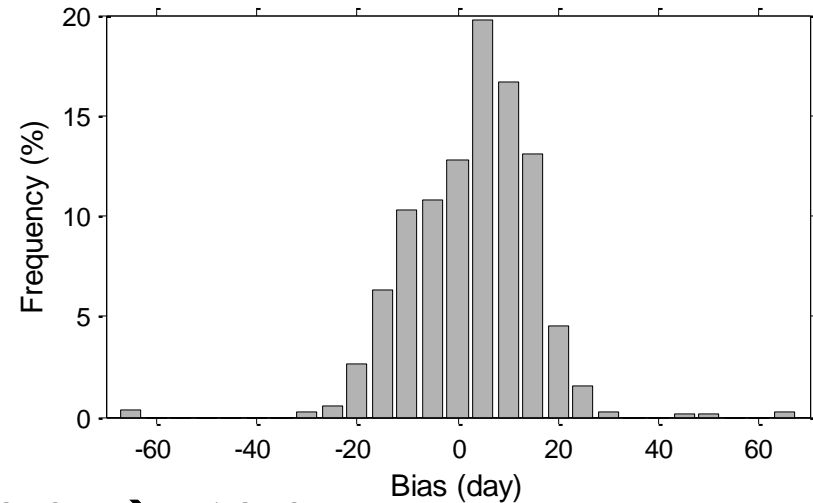

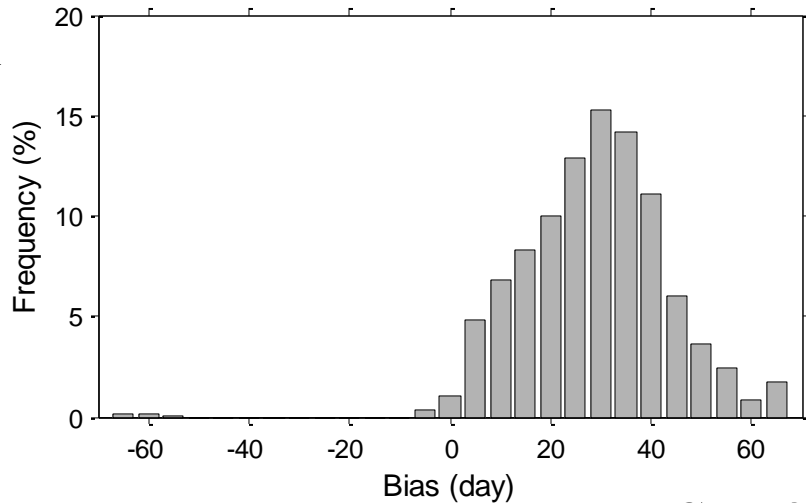

- Spatio-temporal variations over 108 early rice sites (86 to optimize, 22 to cross-validate)
- Black squared indicates randomly selected validation sites

# Spatio-temporal biases

Prior RMSE 34.5 → 12.7

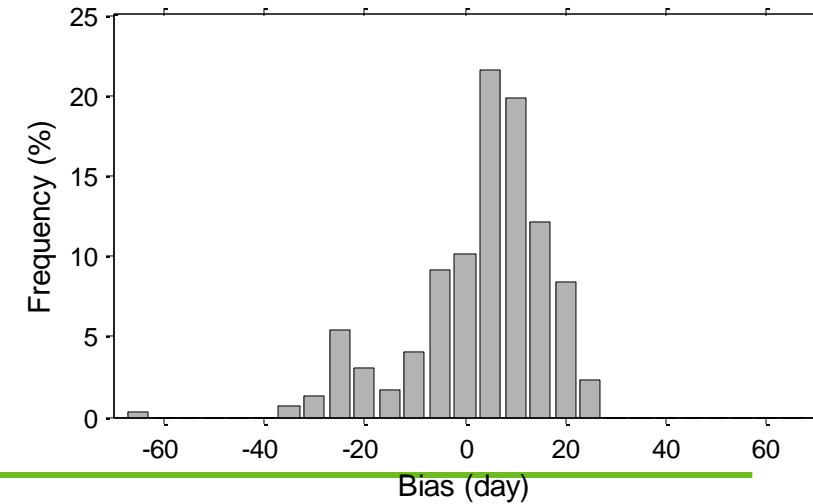

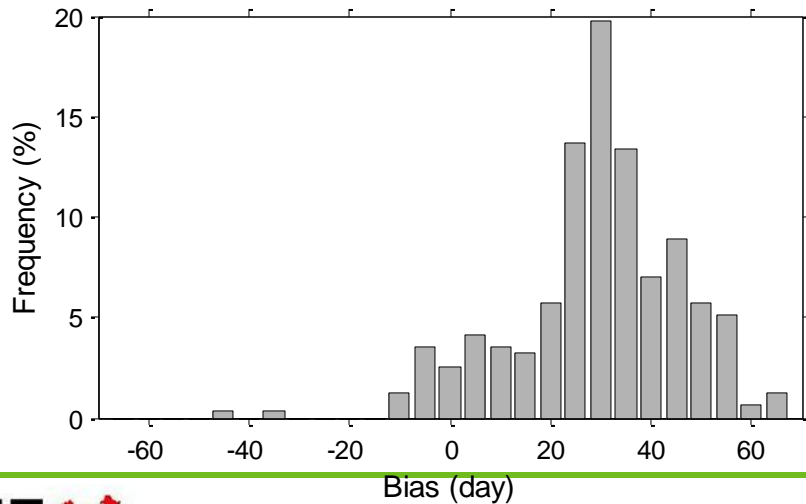

Posterior

Optimization sites

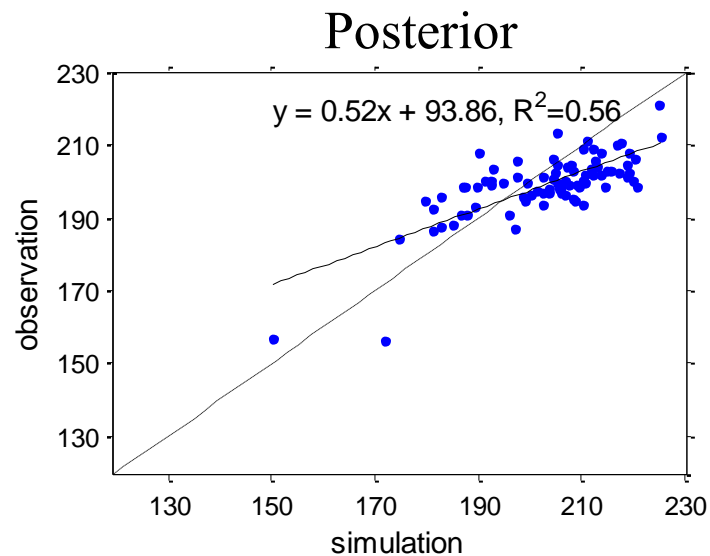

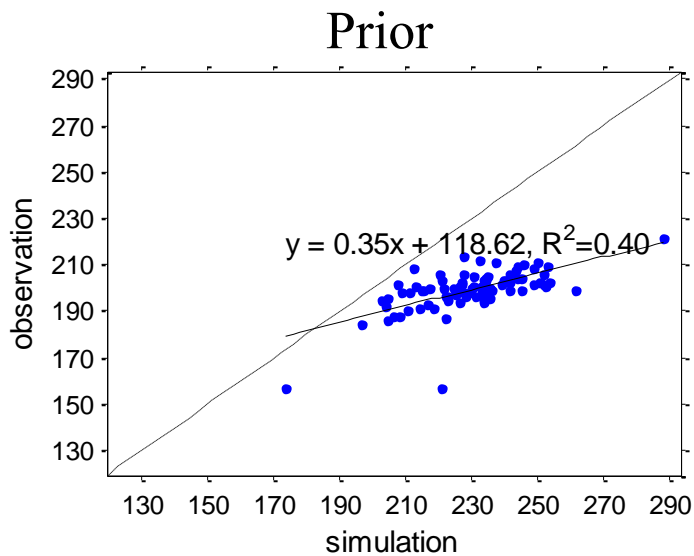

RMSE 33.9 → 13.9

Validation sites

# Spatial gradient

Optimization sites

Validation sites

# Interannual variations

## Prior

## Posterior

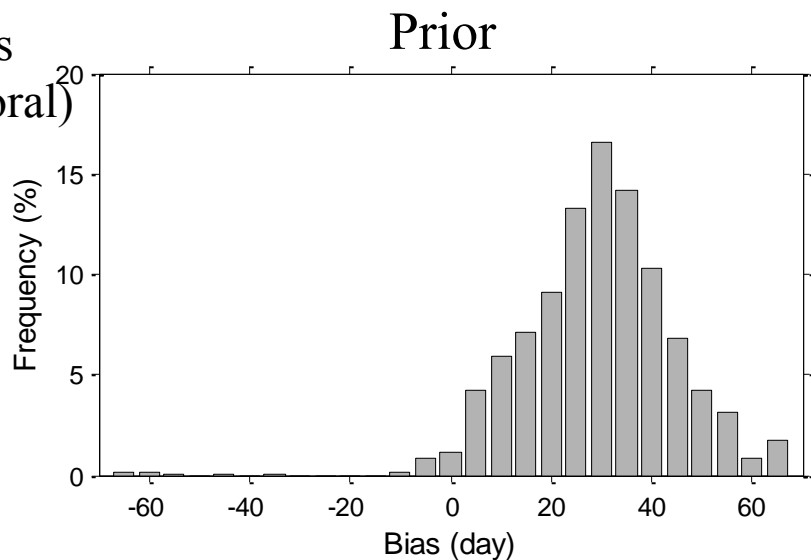

Optimization sites

Validation sites

# For all sites

Overall biases  
(spatio-temporal)

Spatial gradient

# Response to nitrogen fertilizers

Prior parameters from ORCHIDEE-GM (J. Chang)
